

CITY OF MARIANNA
COMMISSION AGENDA ITEM
DATE: February 6, 2018

ADMINISTRATIVE STAFF REPORT

Subject: Adoption of Proposed Resolution 2018-08
Kelson Avenue Stormwater Environmental Mitigation Project
Transportation Alternatives Program Application

Background/Detail: The City was awarded funding from FDOT over a year ago to design a storm water project on Kelson Avenue that would cover the large ditch North of Kelson and East of Jefferson Street. The project also would construct a storm water retention pond on state property to filter water prior to being released into the Chipola River.

The City would like to apply for funding from FDOT to perform the construction of the already designed project. Staff requests to make application to FDOT's Transportation Alternatives Grant Program for continued work on the Kelson Avenue Stormwater Environmental Mitigation Project. In conjunction with the project the existing ditch would be covered and a walking trail established over the ditch, as well as around the proposed retention pond.

Recommendation: This is a continuation of an existing project where design has already been completed staff recommends applying for funding and adopt Resolution 2018-08

Potential Motion: I move to authorize application and adopt Resolution 2018-08 to allow City staff to apply for the FDOT Transportation Alternative Program Grant.
