

**CITY OF MARIANNA  
COMMISSION AGENDA MEMO  
December 18, 2018**

**ADMINISTRATIVE STAFF REPORT**

**Subject:** MERE Complex, Football/Soccer Field Lights

**Background:** Hurricane Michael caused significant damage to all of our lights at the MERE. This agenda item is to have lights replaced and fixed on our 2 football/soccer fields. We consider this part of the light project as an emergency service and have received a price for work thru S&S Electric of 62,615.35 to complete the work needed.

Reasons for consideration as emergency are as follows:  
New poles on North soccer field are leaning and need to be repacked and realigned before further damage is done. South field had five poles completely blown down and primary lines were attached to these which has created a hazard exposed from the ground. The electrical for our sewer lift station was feed from these and cannot be fixed until these poles are replaced and lines are reattached.

Location numbers for insurance purposes is:  
North Field #182  
South Field #033

**Recommendation:** Staff recommends approval of bid in the amount of \$62,615.35 to S&S Electric for materials from Mayer Electric and labor to fix field lighting on North field and install new field lighting on South field due to damages caused by hurricane Michael.

**Potential Motion:** I move to approve the recommendation.
